

BIO-PRO

FUNCTIONAL BIO ACTIVE NUCLEOTIDE'S, BETA GLUCAN'S & MANNAN OLIGOSACCHARIDE'S
Derived from Selected SACCHAROMYCES CEREVISIAE
(Supplement For CATTLE FEEDING)

Product Description: BIO-PRO with a mild overall flavor profile is designed to enhance immunity and FCR's in a variety of feed applications. Best know source for B group vitamins including Chromium & Selenium & Vitamin B12 Content. Our product gives benefits of complete yeast cell, including highly functional BIO ACTICE Nucleotides, Beta Glucans & Mannan's in our product gets easily absorbed by intestine membrane & immediately get available in bloodstream bringing high growth rate & immunity.

Nucleotides: Nucleotides in our product gives Hydrolyzed RNA activity for fast intestine development & better growth which leads to low mortality in young stages of life. The nucleosides guanosine monophosphate (GMP) and inosine monophosphate (IMP) also contribute to improving the palatability. If the feed intake is stimulated, there is consequently a better resistance to disease challenges and also a higher growth rate.

Beta Glucans: This is an immunostimulant to activate the T cells present in the intestine, triggering an activation of the innate immune system.

Mannan oligosaccharides: Absorbs variety of toxins & limit colonization of Gut Pathogen Bacteria like Salmonella, E-Coli & Clostridia spp

Benefits of feeding BIO-PRO to Dairy Cattle & Calves:

- ✘ Nucleotides in BIO-PRO helps modulate immunity.
- ✘ For reducing the incidence of respiratory problems in dairy calves during the weaning period.
- ✘ For generating higher Antibody IgG level after vaccination.
- ✘ For generating higher passive immunity in calves.
- ✘ For improved development of the gut intestinal system & gastrointestinal tract of weaning calves.
- ✘ For Development of higher total bacterial counts in the rumen fluid which results in higher concentrations of beneficial lactic acid bacteria.
- ✘ For preventing neonatal diarrhea.
- ✘ For increase body weight of calves with better FCR's and low young mortality.
- ✘ For increasing of milk yield and milk quality.

Dosage of BIO-PRO Powder for Cattle

Dairy Cattle	: 25 Gms / head per day, 2.5 Kgs per ton of feed
Calves	: 5 Gms / head per day, 1 Kg. per ton of feed

Dosage of BIO-PRO Liquid for Cattle

Dairy Cattle	: 50 ml. / head per day
Calves	: 10 ml. / head per day

Manufactured & Marketed by: BIO PAHARMA
Kalerheri, Haryana, India.
