

BIO PRO

Readily Digestible Nutritional Health Product

**First time in India, For Antibiotic-Free Farming
For Poultry, Broiler & Layer**

**Functional Nucleotides, Beta Glucans
& Manan Oligosaccharides**

Healthy Gut

Healthy Liver

Strong Immunity

Manufactured & Marketed by BIOPHARMA India

GROW WITH BIO PRO

BIO PRO

Readily Digestible Nutritional Health Product

BIO PRO is an all natural fermentation based nutritional product for overall improvement and growth in poultry, livestock & aqua

BIO PRO is not a single compound but rather a fermentation product composed of numerous beneficial metabolites (Proteins, Peptides, Antioxidants, Organic Acid, Nucleotides & Phylosterols) together with beta-glucans and manans to support animal health and performance

BIO PRO is microbial based fermentation research and technology innovation

The bioactive components of BIO PRO are produced using our proprietary anaerobic fermentation technology with *Saccharomyces Cerevisiae*. This closely guarded fermentation process increases unique metabolites that provide beneficial health effects.

BENEFITS

BIO PRO has shown the capacity to control coccidiosis in poultry

BIO PRO helps mitigate the effects of mycotoxins in low quality feeding ingredients and also helps to meet target weight goals by improving FCR'S.

BIO-PRO imparts high immunity which helps in faster recovery of birds from viral infections and intake of feed is recovered faster when recovering from viral infection without compromising much in body weight.

BIO PRO has tremendous advantage that it can be administered even to off-feed / sick birds through water feeding route
