

BioPro - POULTRY

YOUR FLOCKS IMMUNITY, OUR PRIORITY

Resilient to Challenges

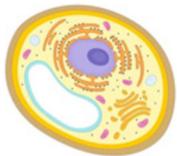

Better Digestion & Healthy Gut

Helps in Antibiotic-Free Poultry Farming

BIO PRO is a scientifically advanced blend of Bio Functional compounds designed to deliver a powerful, multi-functional solution. This unique blend supports Immune Health, Enhances performance consistency which drives Meat & Eggs Production efficiency —helping you achieve more profits with every cycle.

+ YC =

Healthy Gut & Liver

Reduced Oxidative-Stress

Strong Immunity

BIO PRO is a synergistic blend of Hydrolyzed Yeast, Yeast Culture, Hydrolyzed MOS, β -Glucans, Chitins, and Nucleotides, available in two convenient forms: Powder and Liquid. Because the product is in a bio-active, free-form state, its functionality and efficacy are up to 10x greater than conventional insoluble MOS and β -Glucans.

Key Benefits :

- BIO PRO has shown the capacity to Control Coccidiosis & Viral Infections in poultry
- BIO PRO helps mitigate the effects of mycotoxins (E.coli , Salmonella, Campylobacter) in low quality feeding ingredients and also helps to meet target weight goals by improving FCR'S.
- BIO-PRO imparts high immunity which helps in faster recovery of birds from viral infections and intake of feed is recovered faster when recovering from viral infection without compromising much in body weight.
- BIO PRO has tremendous advantage that it can be administered even to off-feed / sick birds through water feeding route
- Promotes Digestibility & Nutrient Absorption: BIO PRO Promotes healthy gut microbiota, as well as improved villi structure and surface area, provide optimal conditions for feed digestion and nutrient absorption

BIO PRO is available in both Liquid & Powder Formulations

RECOMMENDED DOSAGES OF BIO PRO POULTRY

BIO PRO (P) Liquid:

Layers / Broiler / Breeders (ml /L):-

250-500 ml / 1000 Liters Drinking water

**Note: Double the dosages during times of Stress
(Viral Stress / Heat Stress)**

****pH of Feeding Water: For best results Kindly Maintain pH
of around 6 after dosing BIO PRO Liquid****

BIO PRO (P) PMX:

Layers (kg / ton) Feed: 500 grams / ton Feed

Broilers (kg / ton) Feed: 500 grams / ton Feed

Breeders (kg / ton) Feed: 500 grams / ton Feed

BIO PRO (P) SYC:

Layers (kg / ton) Feed: 50 grams / ton Feed

Broilers (kg / ton) Feed: 50 grams / ton Feed

Breeders (kg / ton) Feed: 50 grams / ton Feed

How BIO PRO Saves Time, Cuts Costs, and Drives Profitability

BIO PRO helps streamline your operation by reducing animal health challenges and improving overall performance—leading to measurable gains in both time and income.

Operational & Cost-Saving Benefits:

- Minimizes days in the sick pen, keeping your Flocks productive
- Accelerates recovery and lowers severity of issues like COCCIDIOSIS
- Cuts treatment expenses by reducing disease incidence
- Lowers labor demands for care and health management
- Helps prevent COCCIDIOSIS, reducing associated losses and treatment costs
- Protects against mycotoxin-related performance drops
- Prevents the use of Antibiotics Growth Promoters (AGP's) in Poultry Farming
- Helps in ANTIBIOTIC-FREE EGG production, efficiency, supporting better margins

Supplement for POULTRY Feeding only, Not for Medicinal Use / Human Use
